### Higher inflation spurs upward adjustments to brackets for tax year 2022

The tax brackets on the front of this flier for tax year 2022 apply to tax returns filed in 2023, and the annual adjustments that the IRS made to these brackets are higher than usual—roughly 3% for most brackets—because inflation rose in 2021. The IRS makes inflation adjustments for more than 60 tax provisions to address what’s commonly known as bracket creep—rising prices pushing taxpayers into higher income brackets paying higher tax rates without a comparable increase in purchasing power. At the same time, inflation can erode the value of credits or deductions that can be used to limit tax bills.

The IRS inflation adjustments for tax year 2022 could eventually help to mitigate some of the negative impact that the recent rise in inflation has had on taxpayers. While the bracket adjustments affect taxpayers across the income spectrum to varying degrees, changes to standard deductions apply to all taxpayers. The standard deduction for married couples will increase to \$25,900, or \$800 higher than in the 2021 tax year; for single taxpayers and married individuals filing separately, it will rise to \$12,950, or an increase of \$400; and for heads of households, the standard deduction will be \$19,400, up \$600.

What’s not changing are the basic income-tax rates that were set with the enactment of the Tax Cuts and Jobs Act of 2017, which set the lowest threshold at 10% and the highest at 37%.

### Required minimum distributions

The Uniform Lifetime Table can be used by all IRA owners, unless their sole beneficiary for the entire year is a spouse who is more than 10 years younger. Then the Joint Life Expectancy Table is used (see IRS Pub. 590-B), which could reduce the required minimum distribution (RMD). Taking into account improved mortality rates, the IRS has updated both tables, effective for RMDs required for tax years beginning in 2022. The prior tables still apply to a first-time RMD required for tax year 2021 but deferred until no later than April 1, 2022. Below is the updated Uniform Lifetime Table.

### Uniform Lifetime Table<sup>3</sup>

Age of account owner	Divisor	Age of account owner	Divisor	Age of account owner	Divisor
